Organoleptic characteristics	
<b>Popcorn Sugar (Strawberry Flavour)</b>	Pink coloured small sugar granules with an aroma of sweet strawberry flavouring.
<b>Popcorn Sugar (Apple Flavour)</b>	Green coloured small sugar granules with an aroma of sweet apple flavouring.
<b>Popcorn Sugar (Blueberry Flavour)</b>	Purple coloured small sugar granules with an aroma of sweet blueberry flavouring.
<b>Popcorn Sugar (Raspberry Flavour)</b>	Light blue coloured small sugar granules with an aroma of sweet raspberry flavouring.
<b>Popcorn Sugar (Banana Flavour)</b>	Yellow coloured small sugar granules with an aroma of sweet banana flavouring.
<b>Popping Kernels</b>	Hard, smooth glossy popcorn kernels, with a faint dry aroma of raw grain and cornmeal. Their flavour is mildly starchy and slightly nutty, with a dry, chalky mouthfeel if cracked.
<b>Genetic modification statement</b>	We herewith confirm that the product we supply to you has been produced without the use of genetically modified organisms and/or any products derived from such organisms.
<b>Microbiological statement</b>	The manufacturing of popcorn is an inherently low risk process since all of the ingredients are subject to previous processing and none of them support the growth of microorganisms. The popping process involves high temperatures and the popped corn is packed into sealed bags shortly thereafter. The finished product has a very low water activity (<0.6) and will not support the growth of bacteria. Chemical degradation is very slow, negligible during the shelf-life of the product and not harmful.
